**INSTRUCTIONS FOR USE OF FORK LIFT TIPPING SKIP**

This skip should only be operated by a suitably trained operator wearing the appropriate P.P.E. Equipment (i.e. helmet, goggles, overalls, gloves, and protect footwear)

Always ensure that the Fork Lift being used is of sufficient capacity to lift the load.

The skip should visually inspected prior to commencing work to ensure it is free from defects or damage and is safe to use.

The skip MUST be attached to the fork carriage with the safety chain.

To empty the skip, lower and release the handle safety ring. Raise the skip. Sit the mast forward, ensuring that it is safe to empty. Pull the handle down and the hopper will roll forward and empty. KEEP HANDS CLEAR!  
Do not hold onto any part of the skip or carriage when emptying.

Once empty, lift the mast back and the hopper will automatically close. Ensure the hopper is locked and the safety ring is replaced before moving the skip.

**WARNING**

ALWAYS ENSURE SAFETY CHAIN IS ATTACHED  
ONLY empty when lifting from rear  
NEVER walk under the carriage  
DO NOT use if faulty or damaged
